

Description

The ideal compacting tool for flatwork, trenches and asphalt patching jobs. Compacts while moving forward or in reverse. Offset drum design lets you get right next to sidewalks, walls or curbs. Drum oscillation keeps the roller in contact with the surface on uneven terrain.

Main features

- Free drum oscillation keeps more of the drum in contact with the surface on uneven terrain.
- Offset drum design allows the right side of the roller to extend past the machine. This is very useful when compacting next to sidewalks, walls, or curbs.
- Durable one-piece drum for extra strength.
- Dual-direction vibration motor permits compaction traveling in either direction.
- Rubber isolation mounts on the roller reduce vibration transfer to loader and operator.
- Both smooth and padded drums are available.

Applications

- Construction and Demolition
- Grading and Leveling
- Road work, Recycling and Cleaning
